Borealis Commits \$1 Million to Progression, Inc. Technology

HAVERHILL, MA (July 25, 2006)—Significant project opportunities from Borealis have resulted in strong order commitments to Progression, Inc. during 2006. The purchased goods and services by Borealis during this period include Magneflow® process NMR technology, Correflow® Electrostatic Monitoring equipment as well as advanced technical services. Each of these reflects the value derived from Progression's polyolefin based products.

“Our commitment to relationships and providing value to our customers is the cornerstone of our growing business,” noted Vaughn Davis, CEO of Progression. “We are pleased to work with leading companies such as Borealis and value their commitments to us.”

The broad range of products offered by Progression, allow customers to realize significant benefits by utilizing a number of different technologies, which enable improved process control. Progression has succeeded in developing strong relationships with many of its key customers, which enables Progression to provide better value to each customer plant location.

About Progression, Inc.

Progression, Inc. (www.progression-systems.com) has an extensive background in the development and implementation of process NMR and holds a broad intellectual property portfolio in its use and application. In addition, the company provides LIBS instrumentation, custom sampling systems, two-phase mass flow monitors and electrostatic charge measurement devices for monitoring unique applications within the chemical process industry. The world's largest polyolefin manufacturers rely upon Progression products to improve process efficiency and product consistency.

International business accounts for more than 60 percent of privately held Progression's overall revenues. Strong service and distribution in overseas markets including Europe, Asia, and the Middle East continue to provide exceptional expansion and growth opportunities for Progression.
