### **Engineering Services Expanded at Progression, Inc.**

**HAVERHILL, MA (May 4, 2007)**—Progression, Inc., the world’s leading provider of industrial Nuclear Magnetic Resonance (NMR) analyzers for use in the manufacture of polyolefins, thermoplastic materials, mining, textiles and agricultural products, announced the further expansion of its engineering team.

In response to the growing demand of on-line NMR projects, Progression has expanded the engineering team. Global expansions in the petrochemical and mining industry have resulted in increased automation projects requiring on-line NMR spectroscopy. These additional projects will be handled with the assistance of Mr. John Mansolillo as Sr. Engineer. Mr. Mansolillo has more than 10 years of electrical/automation engineering experience. As graduate of Worcester Polytechnic Institute, with a BS in Electrical Engineering, he has worked with numerous instrumentation companies his career.

William Jensen, Director of Operations for Progression, Inc. commented, “Expanding our team with such qualified talent as Mr. Mansolillo will instantly prove beneficial for our overall efficiency and capability on new and existing projects.”

#### **About Progression, Inc.**

Progression, Inc. ([www.progression-systems.com](http://www.progression-systems.com)) has an extensive background in the development and implementation of process NMR and holds a broad intellectual property portfolio in its use and application. In addition, the company provides LIBS instrumentation, custom sampling systems, two-phase mass flow monitors and electrostatic charge measurement devices for monitoring unique applications within the chemical process industry. The world’s largest polyolefin manufacturers rely upon Progression products to improve process efficiency and product consistency.

International business accounts for more than 60 percent of privately held Progression’s overall revenues. Strong service and distribution in overseas markets including Europe, Asia, and the Middle East continue to provide exceptional expansion and growth opportunities for Progression.
