Technical Specialist Joins Progression Team

Haverhill, MA (January 16, 2008)—Based on the increased demand for online Nuclear Magnetic Resonance (NMR) and Laser Induced Breakdown Spectroscopy (LIBS) applications, Progression, Inc. has appointed Mr. Everett Kysor, as a product specialist to further expand its technical project team. Mr. Kysor is a graduate from Keene State College with a Bachelor of Science in both chemistry and physics. Mr. Kysor has worked with spectroscopy equipment such as NMR, LIBS and FTIR in the past. He also participated in research on the influence of electron density on carbon ring deformation in vanadium complexes with Dr. Colin Abernethy.

Mike Pepe, Project Manager for Progression, Inc. commented, “His experience and talents make him a great fit into the Progression team and an important element in our company’s future growth.”

About Progression, Inc.

Progression, Inc. (www.progression-systems.com) has an extensive background in the development and implementation of process NMR and holds a broad intellectual property portfolio in its use and application. In addition, the company provides LIBS instrumentation, custom sampling systems, two-phase mass flow monitors and electrostatic charge measurement devices for monitoring unique applications within the chemical process industry. The world’s largest polyolefin manufacturers rely upon Progression products to improve process efficiency and product consistency.

International business accounts for more than 60 percent of privately held Progression’s overall revenues. Strong service and distribution in overseas markets including Europe, Asia, and the Middle East continue to provide exceptional expansion and growth opportunities for Progression.
