Sasol Commits to Expanded Use of Progression NMR Technology

Haverhill, MA (June 10, 2008)—Progression, Inc., the world’s leading provider of industrial Nuclear Magnetic Resonance (NMR) analyzers and Laser Induced Breakdown Spectroscopy (LIBS) for use in the manufacture of polyolefins, energy, mining and agricultural products, announced today that they have signed a new contract with Sasol in South Africa for the supply of industrial NMR products and services. This represents the fourth such contract between the two businesses.

“We have enjoyed an excellent long-term relationship with Sasol. Our team has delivered on several successful projects with Sasol at multiple locations during the past decade. This latest contract reflects the on-going value in technology and services that Progression provides to our customers,” remarked Scott A. Marino, President at Progression. “We recognize our position as a valued supplier of Sasol and will remain diligent in our efforts to innovate process NMR solutions that continue to help Sasol’s various business units demonstrate operational excellence.”

About Progression, Inc.

Progression, Inc. (www.progression-systems.com) has an extensive background in the development and implementation of process NMR and holds a broad intellectual property portfolio in its use and application. In addition, the company provides LIBS instrumentation, custom sampling systems, two-phase mass flow monitors and electrostatic charge measurement devices for monitoring unique applications within the chemical process industry. The world’s best polyolefin manufacturers rely upon Progression products to improve process efficiency and product consistency.

International business accounts for more than 60 percent of privately held Progression’s overall revenues. Strong service and distribution in overseas markets including Europe, Asia, and the Middle East continue to provide exceptional expansion and growth opportunities for Progression.
