Martin Goldenblatt Joins Progression To Lead Energy Business

Haverhill, MA (August 4, 2008)—Progression, Inc., the world's leading provider of industrial Nuclear Magnetic Resonance (NMR) analyzers and Laser Induced Breakdown Spectroscopy (LIBS) for use in the manufacture of polyolefins, energy, mining and agricultural products, announced today that Martin K. Goldenblatt has joined as Vice President of Sales—Energy Systems. Mr. Goldenblatt will be responsible for managing sales activities and developing new business opportunities in the energy sector.

“Marty brings a wealth of experience and skill to our team.” said Scott A. Marino, President of Progression, Inc. “We searched for someone who had demonstrated a high level of success while working in the utility industry and understands the unique challenges and opportunities of the energy industry. His technical background combined with his commercial understanding of the marketplace makes him perfectly suited to lead our growth in the energy sector.”

“Progression’s products provide a unique opportunity to help utilities reduce their carbon footprint while improving the efficiency of their fossil fueled power plants which will result in reduced costs. I am excited to be part of the Progression team,” said Marty Goldenblatt.

Mr. Goldenblatt brings over twenty years of sales and business development experience in utility and energy-related industries. Mr. Goldenblatt’s recent experience has included bringing to market technology for converting the greenhouse gases released from the burning of fossil fuels into value added products such as biodiesel and ethanol. He was also instrumental in the growth of companies in the energy sector by bringing to market application software and services that addressed utility business needs resulting from deregulation.

Mr. Goldenblatt has served in executive positions at such companies as Greenfuel Technologies, World Energy and LODESTAR. He served on the Board of Directors at both World Energy and at LODESTAR where he was also a founder. Mr. Goldenblatt received a bachelor’s degree mechanical engineering from the City University of New York and a master’s degree in mechanical engineering from Northeastern University.

About Progression

Progression, Inc. (www.progression-systems.com) has an extensive background in the development and implementation of process NMR and holds a broad intellectual property portfolio in its use and application. In addition, the company provides process LIBS instrumentation, custom sampling systems, two-phase mass flow monitors and electrostatic charge measurement devices for monitoring unique applications within the chemical, energy and mining industries. Progression’s innovative energy solutions are used for the real-time analysis of fossil fuels (BTU, moisture and elemental analysis) to improve efficiency and lower carbon emissions for power generation facilities.
